OFFICE OF LEGISLATIVE COUNSEL

Monday - 20 November 1967

25X1

2. [REDACTED] Picked up from the Joint Committee on Atomic Energy staff the transcript of the Director's briefing of 8 November and copies of the prepared statement which had been left for the use of the Committee members during the briefing.

3. [REDACTED] Handcarried to Mr. Giuffre, in the office of Representative Edward Patten, a letter explaining the situation regarding the Agency's proposal [REDACTED]

4. [REDACTED] Met with James Gehrig, Senate Aeronautical and Space Sciences Committee staff, concerning our briefing of the Chairman and Senator Margaret Chase Smith on 29 November. Gehrig said they were interested in covering space developments since we last met with them, particularly recent Soviet accomplishments in boosters and a discussion of the FOBs. During the conversation, Gehrig mentioned the possibility of Senators Magnuson and Allott being present at the meeting. I am to be in touch with Gehrig again before the briefing.

5. [REDACTED] Talked with Stan Brown, Administrative Assistant to Senator Jack Miller, to determine whether Senator Miller might have obtained a copy of a statement made by [REDACTED] at the recent FAO Conference in Rome which the Senator attended. Mr. Brown said he was not informed on this but would check on it and be back in touch with me.
